NexaWorks

Response to Request for Proposal

RFP-2026-017: Enterprise Vendor Management and Spend Analytics Platform (500 users, SAP S/4HANA + Oracle Fusion Finance + Okta SSO integration)

Submitted by: NexaWorks (fictional supplier for classroom use)
Validity of offer: 90 days from submission.

Company Profile

NexaWorks is a mid-sized software company with 320 employees and offices in Toronto and Dublin. It combines a modular product with a professional services and customer success organisation, and is known for predictable, well-governed delivery.

1. Executive Summary

NexaWorks proposes its NexaSource platform, a modular vendor management and spend analytics suite. Our approach balances capability, cost and delivery certainty, and is backed by a mature delivery methodology and a dedicated customer success organisation.

We have studied the RFP requirements for SAP S/4HANA, Oracle Fusion Finance and Okta integration and have planned delivery around them.

2. Proposed Solution and Architecture

NexaSource is a modular SaaS platform with a documented REST API. Pre-built connectors exist for SAP S/4HANA and Oracle Fusion Finance, and SSO is supported with SAML and OIDC for Okta. The platform auto-scales and has been load tested at 1,500 concurrent users, with a 99.9% uptime SLA and daily cross-region backups.

3. Implementation Plan, Timeline and Team

Delivery takes 6 months in six phases with a week-level plan: Mobilise (weeks 1-2), Design (3-6), Build (7-16), Integrate (17-20), UAT with parallel run (21-24), Cutover and 90-day hypercare. A 14-person team is named with a RACI matrix covering the project manager, solution architect, data lead, integration leads, QA lead and change manager.

A risk register with 10 identified risks and mitigations (data quality, scope creep, stakeholder availability, ERP release freezes) is reviewed weekly. Every milestone has acceptance criteria and a sign-off owner. Training covers administrators, buyers and approvers.

4. Price Table (3-year, USD)

Item	Year 1	Year 2	Year 3
Platform licence (500 users)	300,000	300,000	300,000
Implementation and integration	240,000	-	-
24x7 support and customer success	55,000	55,000	55,000
Total	595,000	355,000	355,000

Assumptions: fixed-price implementation; licence fixed for 3 years; data migration up to 3 million records included; no hidden fees. Grand total: USD 1,305,000.

5. Security and Compliance

NexaWorks is ISO 27001 certified and holds a SOC 2 Type II report. Data is encrypted at rest and in transit, access is role-based with MFA, and audit trails are retained for 5 years. Annual third-party penetration testing is performed. A GDPR data processing agreement is provided.

6. Support Model, Experience and References

Follow-the-sun 24x7 support with a 1-hour P1 response time and a named customer success manager (CSM) for the account. We have delivered 5 similar projects in the last three years and a structured training programme with quarterly reviews.

References: four customers available (manufacturing, healthcare, logistics, and retail) with case studies attached.
