Orbit Digital

Response to Request for Proposal

RFP-2026-017: Enterprise Vendor Management and Spend Analytics Platform (500 users, SAP S/4HANA + Oracle Fusion Finance + Okta SSO integration)

Submitted by: Orbit Digital (fictional supplier for classroom use)
Validity of offer: 90 days from submission.

Company Profile

Orbit Digital was founded in 2008 and has 210 employees. It is a specialist in procurement technology and services with a large installed base and many long-standing enterprise customers in manufacturing and the public sector.

1. Executive Summary

Orbit Digital has 18 years of experience delivering procurement technology and has completed more than 40 deployments for enterprise customers. We propose our OrbitSource platform together with our experienced services team.

Our strength is delivery experience and customer relationships; many of our clients have been with us for over a decade.

2. Proposed Solution

OrbitSource is a web-based vendor management platform covering onboarding, contracts, scorecards and spend dashboards. We will integrate with the client's ERP landscape using our flexible integration framework. The specific connectors and effort will be defined during the discovery phase. SSO will be supported using the client's identity provider.

The platform scales as required for the user volume of this project.

3. Implementation Plan

The project runs for approximately 7 months. Phases are Discovery, Build, Test and Go-live; the detailed plan will be finalised after discovery. The team will be staffed from our delivery pool and a project manager will be assigned. Risks will be tracked in a standard log.

4. Price Table (3-year, USD)

Item	Year 1	Year 2	Year 3
Platform licence (500 users)	330,000	330,000	330,000
Implementation services	190,000	-	-
Integration work	time and materials, estimate TBD	-	-
Support	45,000	45,000	45,000

Assumptions: integration effort will be billed on time and materials; indicative total USD 1,250,000 excluding integration.

5. Security and Compliance

Orbit Digital is ISO 27001 certified and GDPR compliant. Data is encrypted in transit and at rest. A SOC 2 Type I report is available; Type II is planned for next year. Audit logging is provided at application level.

6. Support Model, Experience and References

Support is available 8x5, with 24x7 cover for P1 incidents and a 2-hour P1 response. Over 18 years we have completed more than 40 similar deployments across industries, with long-standing client relationships.

References: six named reference customers, with case studies and contact details in Appendix C, including two global manufacturers and a public-sector agency. Customer satisfaction has averaged 4.6/5 over the last five years.
